

High-Speed Cutting Disc for Metal Shearing

This cutting disc is designed for metal shearing machines. It has a maximum speed of 70 m/s and comes in sizes such as 305x3.2x25.4mm, 355x3.2x25.4mm and 405x3.2x25.4mm.

Overview

High-Performance Metal Shearing

This high-speed cutting disc is engineered specifically for demanding metal shearing applications. Designed for safety and efficiency, it supports a maximum operating speed of 70 m/s. It is manufactured to meet rigorous industry standards, ensuring consistent performance for professional metalworking environments.

Technical Specifications

Maximum Operating Speed	70 m/s
Compliance Standards	JB/T4175-1994, China Standards

Available Configurations

Available Sizes and RPM

Dimensions (mm)	Max RPM
305 x 3.2 x 25.4	4400
355 x 3.2 x 25.4	3800
405 x 3.2 x 25.4	3300

Safety and Usage

Operational Safety

- Ensure correct mounting before use
- Always use a protective guard during operation
- Do not exceed maximum RPM ratings
