

High-Speed Direct Drive Lockstitch Sewing Machine

This high-speed, direct-drive lockstitch sewing machine is designed for industrial sewing applications. It features a direct-drive motor for efficient and precise operation, reducing noise and vibration.

Overview

Industrial Precision

This high-speed, direct-drive lockstitch sewing machine is engineered for demanding industrial sewing environments. Featuring a direct-drive motor, it delivers efficient and precise operation while significantly reducing noise and vibration levels. The unit is equipped with an advanced control panel that allows for seamless adjustments of critical sewing parameters, including stitch length and speed, ensuring consistent quality for garment manufacturing and textile processing.

Key Features

Machine Type	Direct Drive Lockstitch
Suitable Applications	Garment Manufacturing, Textile Processing, Industrial Sewing

Performance

Performance Metrics

9001 MX-D3

Model Series

Operational Benefits

- Direct-drive motor for efficiency
- Reduced noise and vibration
- Advanced digital control panel
- Adjustable stitch length
- Adjustable sewing speed
