

High-Speed Direct Drive Lockstitch Sewing Machine

This high-speed direct drive lockstitch sewing machine is designed for apparel and textile manufacturing. It features a direct drive motor for efficient power transmission and precise control.

Overview

High-Performance Sewing Solution

The LS 8700MX-D2 is a high-speed direct drive lockstitch sewing machine engineered specifically for apparel and textile manufacturing environments. It utilizes advanced direct drive motor technology to ensure efficient power transmission, precise control, and reliable operation. Designed for high-speed production lines, this machine maintains consistent stitch quality across a wide variety of sewing applications.

Technical Specifications

Drive System	Direct Drive
Stitch Type	Lockstitch

Key Features

Performance Highlights

8700 MX-D2
Series Model

Industry Suitability	Apparel Manufacturing, Textile Industry, High-Speed Production
