

High-Speed Document Scanner with ADF and OCR

This document scanner is designed for high-speed document capture and processing. It features an automatic document feeder (ADF) for batch scanning, optical character recognition (OCR) capabilities, and multiple connectivity options.

Overview

High-Efficiency Document Management

The K600 is a high-speed document scanner engineered for professional environments requiring rapid and accurate document capture. Equipped with an Automatic Document Feeder (ADF) and integrated Optical Character Recognition (OCR), it transforms physical paperwork into searchable, editable digital assets. Its versatile connectivity and support for various paper types make it an essential tool for streamlined business workflows.
