

High-Speed Electric Grinding Head

This high-speed electric grinding head is designed for precise material removal and shaping. It is suitable for engraving, polishing, and deburring applications, and features variable speed control.

Product Overview

High-Speed Precision Grinding

This high-speed electric grinding head is engineered for precision material removal, shaping, and finishing tasks. Designed with versatility in mind, it is suitable for engraving, polishing, and deburring applications across various materials. The unit features variable speed control for optimal performance and a compact, ergonomic design to ensure comfortable handling and precise control during operation.

Technical Specifications

Control Features

- Variable speed control
- Collet chuck for secure bit retention
- Ergonomic design

Primary Applications

Engraving, Polishing, Deburring, Material Removal, Shaping

Ergonomic Design

Yes
