

High-Speed Electronic Weighing and Bagging Machine

This automatic packaging machine is designed for high-speed and precise weighing and bagging of granular or powdered materials. It features an electronic weighing system, automatic bag sealing, and a conveyor belt for efficient material handling.

Overview

High-Speed Automated Packaging Solution

The DCS-25H is an automatic packaging machine engineered for the rapid, precise weighing and bagging of granular or powdered materials. Designed for industrial efficiency, it integrates an advanced electronic weighing system with automated bag sealing and a conveyor belt for streamlined material handling. This robust solution is ideal for diverse manufacturing environments requiring consistent accuracy and high-speed throughput.

Technical Specifications

Model Number	DCS-25H
Suitable Materials	Granular materials, Powdered materials

Key Features

Integrated Components

- Electronic weighing system
- Automatic bag sealing unit
- Conveyor belt material handling

Performance Metrics

Operational Efficiency

25 kg

Capacity Class
