

High-Speed Flatbed Chain Stitch Sewing Machine

This is a high-speed flatbed chain stitch sewing machine. It supports both single and double needle operation for diverse sewing applications.

Overview

High-Speed Flatbed Chain Stitch Machine

This high-speed flatbed chain-stitch sewing machine is engineered for versatile single or double needle operations in professional apparel and textile manufacturing. Designed to handle the demands of high-volume production, the unit features robust construction for long-term durability. Integrated automatic lubrication and adjustable stitch length settings ensure consistent performance and precise stitching results.

Technical Specifications

Machine Type	Flatbed Chain Stitch
Needle Configuration	Single needle, Double needle

Key Features

Core Features

- High-speed operation
- Automatic lubrication system
- Adjustable stitch length
- Robust heavy-duty construction

Operational Safety

Operating Safety Requirements

- Always operate with safety devices engaged
- Read operating manual before threading or changing parts
- Shut off power immediately in case of smoke, strange noise, or overheating
