

High-Speed Flatbed Lockstitch Sewing Machine

This high-speed single-needle flatbed lockstitch sewing machine is engineered for efficient and precise stitching in various textile applications. It features a robust construction for durability and stability during high-speed operation.

Overview

High-Speed Industrial Performance

This high-speed single-needle flatbed lockstitch sewing machine is engineered for efficient and precise stitching across a wide range of textile applications. It features a robust construction designed to provide durability and stability during high-speed operation, ensuring consistent results. The integrated smooth feeding mechanism effectively prevents fabric puckering, while adjustable settings for stitch length and tension allow for complete customization based on specific fabric types and project requirements.

Technical Specifications

Model Number	TY 8736-3A
Machine Type	Single-needle flatbed lockstitch

Features

Key Features

- High-speed operation capability
- Robust construction for enhanced durability
- Smooth feeding mechanism
- Adjustable stitch length settings
- Adjustable tension control

Safety

Safety Compliance	Safety devices included, Moving parts caution
-------------------	---

Usage

Suitable Environments
Industrial • Commercial
