Overview

High-Performance Vegetation Management

This high-speed grass chopper is engineered for demanding agricultural and landscaping applications, offering superior power and maneuverability. Featuring a robust 225cc engine, it outperforms standard models, while the adjustable handle and differential-equipped wheels ensure ease of operation across diverse terrains. Designed with safety and efficiency in mind, it includes synchronized belt transmission and specialized blades that turn vegetation into natural fertilizer.

Technical Specifications

Engine Displacement

225 cc

Displacement

Gear Sequence

R-0-2-1

Transmission

Synchronized belt transmission

Safety Standards

CE Certified

Operational Features

Maneuverability

- Differential-equipped walking wheels for easy turning
- Multi-directional handle (up, down, left, right)
- Easy-to-read gear illustration on handle bar

Adjustability

- Adjustable cutting depth
- Adjustable handle position

Optional Accessories

Iron wheels
