

High-Speed Lockstitch Chenille Combination Embroidery Machine

This high-speed combination embroidery machine integrates lockstitch and chenille capabilities. It is designed for efficient and versatile textile production on a variety of fabrics.

Product Overview

High-Speed Lockstitch Chenille Combination

The ZJ800-FB is a high-speed lockstitch chenille combination embroidery machine engineered for efficient, versatile textile production. By integrating both lockstitch and chenille capabilities, this machine allows for intricate, textured designs across a diverse range of fabric types. Designed for industrial-scale output, it features a robust construction and precise needle control to ensure high-quality embroidery results.

Key Features

Applications

- Apparel manufacturing
- Home textiles
- Decorative applications

Stitching Modes

Lockstitch, Chenille
