

High Speed Lockstitch Sewing Machine

This is a high-speed single-needle flatbed lockstitch sewing machine. It is designed for apparel and textile manufacturing with a robust construction for industrial use.

Overview

High-Performance Industrial Sewing

This high-speed single-needle flatbed lockstitch sewing machine is engineered specifically for the demands of apparel and textile manufacturing. Its robust construction ensures reliability in high-volume production environments, while the precise stitching mechanism delivers consistent quality. Designed for versatility, it features adjustable settings that allow operators to adapt to various fabric types and sewing applications effectively.

Technical Specifications

Machine Type	Single-needle flatbed lockstitch
Application Suitability	Apparel Manufacturing, Textile Production, High-Volume Industrial Use

Safety and Operation

Operational Safety

- Static electricity may cause sparks during sewing or when removing fabrics
- Use caution when operating with synthetic or specific fabric types

Key Features

Performance Highlights

1 needle

Needle Count

8850
