

High-Speed Lockstitch Sewing Machine

This high-speed, single-needle, lockstitch industrial sewing machine is designed for diverse sewing applications. It features adjustable stitch length and an automatic lubrication system for enhanced durability and performance.

Overview

High-Speed Industrial Performance

This high-speed, single-needle lockstitch machine is engineered for reliability and high output in professional textile environments. Featuring robust construction, it ensures consistent performance for both garment manufacturing and upholstery applications. The machine integrates an automatic lubrication system to minimize maintenance requirements and extend service life for demanding production schedules.

Technical Specifications

Lubrication

Automatic Lubrication

Stitch Type

Single needle lockstitch

Suitable Materials

Lightweight fabrics, Medium-weight fabrics

Performance Features

Key Performance Features

1 unit

Needle Count

Operational Advantages

- High-speed motor for maximum productivity
- Adjustable stitch length mechanism for precise density control
- Large working area for improved handling
- User-friendly controls for rapid operator adoption
