

High-Speed Lockstitch Sewing Machine for Garments and Shoes

This high-speed, single-needle lockstitch sewing machine is designed for efficient and precise stitching of garments, shoes, and accessories. It is suitable for various fabrics and materials, offering versatility for diverse sewing applications in the apparel and textile industry.

Product Overview

High-Performance Lockstitch Solution

This high-speed, single-needle lockstitch sewing machine is engineered for precision and efficiency in garment and shoe manufacturing. Designed with a robust build, it ensures consistent performance across various fabrics and materials. The integrated automatic lubrication system promotes smooth operation and significantly extends the machine's service life, making it a reliable asset for industrial apparel and textile production lines.

Technical Specifications

Stitch Type	Single Needle Lockstitch
Lubrication	Automatic
Key Features	High-Speed Operation, Adjustable Stitch Length, Robust Build Quality, Automatic Lubrication

Applications

Primary Industries

- Garment Manufacturing
- Footwear Production
- Accessories Manufacturing
- General Textile Industry
