

High-Speed Lockstitch Sewing Machine with Auto-Trimmer

This high-speed lockstitch sewing machine includes an automatic thread trimmer. It features a stable machine head for reduced vibration and quiet operation, and is designed for low-tension sewing on various fabrics.

Overview

High-Performance Lockstitch Precision

This high-speed lockstitch sewing machine is engineered for efficiency and reliability in professional environments. Featuring an automatic thread trimmer and lower stop position function, it streamlines operations and significantly enhances workflow productivity. The rigid, stable machine head design ensures a quiet, low-vibration experience, while its capability for low-tension sewing allows for consistent, high-quality stitches across a diverse range of fabric types.

Performance Metrics

Max Sewing Speed

5000 spm
Stitches Per Minute

Technical Specifications

Needle System	DBx1#11
Max Stitch Length	4 mm
Presser Foot Lift	13 mm

Physical Dimensions

Machine Dimensions	595 x 230 x 553 mm
Weight	37.5 kg

Key Features

Design Advantages

- Rigid machine head structure
- Low vibration operation
- Quiet working environment
- Versatile fabric compatibility

Automation Capabilities	Automatic Thread Trimmer, Lower Stop Position, Low-Tension Sewing
