

High-Speed Lockstitch Sewing Machine with Auto Trimming

This high-speed lockstitch sewing machine provides stable and rigid performance. It includes automatic thread trimming and back tacking functions for simplified operation and improved efficiency.

Overview

High-Performance Lockstitch Solution

This high-speed lockstitch sewing machine is engineered for optimal stability and high rigidity, ensuring reliable performance in demanding environments. Designed with a focus on operator comfort, it features a low-vibration and low-noise mechanism that maintains a quiet workspace. The machine excels at low-tension sewing across a wide variety of fabrics, delivering beautiful, stable stitches while enhancing productivity through automatic thread trimming and back-tacking functions.

Performance Metrics

Maximum Sewing Speed

5000 spm
Max Speed

Automation Capabilities

Automatic Thread Trimming, Automatic Back Tacking

Technical Specifications

Weight

Type	Weight
Net Weight	30
Gross Weight	37.5

Needle Type

DBx1#11

Dimensions (L x W x H)

595 x 230 x 553 mm
