

High-Speed Overlock and Chainstitch Sewing Machines

These high-speed sewing machines are designed for overlocking and chainstitching. They are suitable for various fabric types, including thin, medium, and thick fabrics, and applications like bordering and pocket sewing.

Overview

High-Speed Industrial Sewing Solutions

This series of high-speed industrial sewing machines is engineered for versatility and precision in garment manufacturing. Designed to handle a wide range of fabric thicknesses—from thin to medium and thick materials—these units support essential operations including overlocking, bordering, and trousers pocket sewing. With specialized configurations available for two, three, four, and five-thread operations, these machines provide robust performance for professional sewing environments.

Machine Capabilities

Fabric Compatibility

Thin Fabric • Medium Fabric • Thick Fabric

Suitable Applications

Overlocking, Bordering, Trousers Pocket Sewing, Chainstitch

Technical Specifications

Model Specifications

Model	Stitch Width (mm)	Presser Foot Lift (mm)	Needle Type
GN17-1	3-6	25	GNx1 11~14
GN17-1H	4.8-6	26.5	GNx1 16~20
GN8-1	2-5	25	GNx1 9~11
GN8-1H	6	26.5	GNx1 16~18
GK101-1	3-6	25	GNx1 11~14
