

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It features robust construction, multiple thread capability, and an integrated waste collection system.

Product Overview

Industrial High-Speed Overlock Solution

This high-speed overlock sewing machine is engineered for demanding industrial environments, including garment, shoe, and accessory manufacturing. It features robust construction for long-term durability and consistent performance across a wide range of materials. With integrated waste collection and multi-thread capability, it ensures both operational efficiency and a clean, safe workspace.

Technical Specifications

Thread Capability

Multi-thread

Model Number

GN794D-5

Machine Type

Overlock Sewing Machine

Features

Key Features

- High-speed operation
- Integrated waste collection system
- Precision engineering
- Robust industrial construction

Applications

Suitable Industries

Apparel Manufacturing, Shoe Production, Accessory Manufacturing

Safety

Safety Requirements

Wear safety glasses to avoid eye injury from flying needles or threads.
