

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for efficient and precise fabric edge finishing. It features adjustable stitch length and width and a built-in thread trimmer.

Overview

Professional Edge Finishing

This high-speed overlock sewing machine is engineered for high-efficiency fabric edge finishing in apparel and textile manufacturing environments. It features advanced capabilities including adjustable stitch length and width, along with differential feed technology to ensure smooth fabric handling without puckering or stretching. The integrated thread trimmer maximizes productivity, making it an ideal solution for various fabric types and industrial applications.

Technical Specifications

Key Features

- Adjustable stitch length
- Adjustable stitch width
- Differential feed mechanism
- Built-in thread trimmer

Model Number

GN794D-5

Safety & Compliance

Laser Safety Class

Class 2 Laser Product

Laser Specifications

30 mW

Max Output

635 nm

Wavelength Range

Compliance Standards

IEC 60825-1:2014
