

High-Speed Overlock Sewing Machine for Textiles

This high-speed overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It delivers precise stitching and efficient operation for seaming, hemming, and edging across a wide range of fabrics.

Overview

High-Speed Industrial Overlock Machine

This high-speed overlock sewing machine is engineered for professional garment, shoe, and accessory manufacturing. It delivers precise, high-efficiency stitching and robust construction, ensuring reliability in demanding industrial production environments. The machine is versatile enough to handle seaming, hemming, and edging operations across a wide variety of textile materials.

Performance Metrics

Suitable Industries

Garment Manufacturing • Shoe Production • Accessories

Model Number	CS700-3
Primary Applications	Seaming, Hemming, Edging

Technical Specifications

Machine Type	Industrial Overlock Sewing Machine
Country of Origin	China
