

High Speed Pulse MIG Welding Machine

This is a versatile welding machine suitable for various welding applications. It utilizes advanced pulse MIG technology to deliver precise and efficient welding results.

Overview

High-Performance Pulse MIG Welding

The AMIG-PM series is a full digital pulse MIG welding system engineered for versatility and precision. Utilizing advanced DSP and waveform control technology, this machine ensures superior arc stability and weld pool management, resulting in spatter-free performance. It is designed to support both manual and automated or robotic welding applications, making it an ideal solution for high-efficiency industrial production.

Technical Capabilities

Control Technology

- High-end DSP (Digital Signal Processing)
- Advanced waveform control technology
- Digital wire feeder compatibility
- Digital torch integration

Welding Processes

Pulse MIG, Digital Control, Manual Welding, Robotic Welding, Automation Ready

Physical Attributes

Construction

Robust • Industrial Grade • Wheeled Cart

Portability

Yes
