

High-Speed Rotary Angle Grinder for Material Processing

This power tool is used for grinding, cutting, and polishing various materials. It features a high-speed rotating abrasive disc, a safety guard, and a handle for secure grip and control.

Product Overview

High-Speed Rotary Angle Grinder

This high-speed rotary angle grinder is engineered for versatile material processing, including grinding, cutting, and polishing tasks. Designed for metalworking and construction applications, it features a robust M14 spindle thread and an ergonomic soft grip for enhanced control. With integrated safety features like a spindle lock and lock-off/lock-on functions, this tool provides both reliability and ease of use for professional projects.

Technical Specifications

Spindle Thread	M14
Safety Features	Spindle lock, Lock-off function, Lock-on function

Design & Ergonomics

Handle Design	Soft grip
