

# High-Speed Servo Motor Packaging Machine

This high-speed packaging machine achieves a stable running speed of 100 bags per minute. The three servo motor system ensures fast packing speeds and requires minimal maintenance.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Packaging Solution

This high-speed packaging machine utilizes a full servo motor system to deliver precise and efficient operation for various packaging needs. Constructed from durable, hygienic stainless steel, it is designed for accurate filling, sealing, and cutting applications. With a user-friendly interface, operators can easily monitor performance and make adjustments to ensure high throughput and minimal downtime.

## Technical Specifications

### Standards Compliance

YST PHARMA

### Construction Material

Stainless Steel

### Control System

Full Servo Motor System

### Handling Capabilities

Fine Powder, Filling, Sealing, Cutting

## Performance Metrics

### Packaging Capacity

**3 g**

Max Capacity

**1.5 g**

Standard Fill
