

High-Speed Steel Circular Saw Blade

This high-speed steel circular saw blade is suitable for cutting various materials. It features precision-ground teeth for smooth, accurate cuts and incorporates expansion slots to reduce warping.

Product Overview

High-Performance Cutting Solution

This high-speed steel circular saw blade is engineered for precision and durability across a wide range of industrial applications. Featuring precision-ground teeth, it delivers smooth, accurate cuts while minimizing vibration and noise for an efficient user experience. The integrated expansion slots are specifically designed to reduce warping and heat buildup, ensuring consistent performance during demanding operations.

Technical Specifications

Performance Features

- Precision-ground teeth for accuracy
- Expansion slots to reduce warping
- Heat buildup reduction technology
- Vibration and noise suppression

Material	High-Speed Steel (HSS)
Suitable Materials	Woodworking, Metalworking, Plastic
