

High-Speed Steel Fully Ground Drill Bit

This high-speed steel drill bit is designed with a fully ground construction for accurate drilling. It is suitable for use on wood, plastic, and metal.

Product Overview

High-Speed Steel Fully Ground Drill Bit

This high-speed steel (HSS) drill bit is engineered for versatility, making it suitable for drilling into a wide range of materials including wood, plastic, and metal. The fully ground construction ensures precise hole sizes and superior cutting performance compared to standard bits. Featuring a durable black and gold finish, this tool is designed for enhanced wear resistance and longevity in both professional and DIY applications.

Technical Details

Material	High-Speed Steel (HSS)
Construction	Fully Ground
Finish	Black, Amber

Applications

Compatible Materials

- Wood
- Plastic
- Metal

Design Features

Shank Design	Designed for secure chucking and efficient power transfer
