

High-Speed Steel Hole Saw

This high-speed steel (HSS) hole saw is designed for creating precise and clean holes in various materials. It features sharp cutting teeth for efficient material removal and includes a pilot drill for accurate hole placement.

Product Overview

High-Speed Steel Hole Saw

This high-speed steel (HSS) hole saw is engineered for creating precise and clean holes across a variety of professional applications. Featuring durable construction and sharp cutting teeth, it ensures efficient material removal for tasks ranging from woodworking to metalworking and plumbing. The design includes an integrated pilot drill for accurate positioning and a robust arbor for secure attachment to drilling equipment.

Technical Specifications

| | |
|--------------|---|
| Material | High-Speed Steel (HSS) with Titanium Plating |
| Key Features | Titanium Plated, High-Speed Steel, Pilot Drill Included, Robust Arbor |

Applications

Common Applications

- Woodworking
- Metalworking
- Plumbing
