

High-Speed Steel Hole Saw

This high-speed steel hole saw is designed for creating precise and clean holes in various materials. It features sharp, hardened teeth for efficient cutting.

Product Overview

High-Speed Steel Hole Saw

This high-speed steel (HSS) hole saw is engineered for creating precise and clean holes across a variety of materials. Featuring durable construction with sharp, hardened teeth, it ensures efficient and consistent cutting performance. The design includes a pilot drill for accurate hole placement and an integrated spring mechanism to easily eject the cut material slug, making it a reliable tool for professional electrical, plumbing, and general construction applications.

Technical Specifications

Material Composition	High Speed Steel (HSS)
Key Features	Hardened Teeth, Pilot Drill Included, Slug Ejection Spring, Durable Construction

Compatibility

Application Areas

- Electrical Installation
- Plumbing
- General Construction

Tool Compatibility	Standard drill chucks
