

High-Speed Steel Planer Blades for Woodworking

These high-speed steel planer blades are designed for power planers. They offer precision cutting and durability for woodworking applications.

Product Overview

Precision Woodworking Blades

These high-performance planer blades are engineered for smooth, consistent planing results on both hard and soft wood types. Designed with durability in mind, they feature heat-treated steel bodies and high-frequency induction welding to ensure a long service life. Whether for professional carpentry or woodworking projects, these blades provide the sharpness and reliability needed for high-quality surface finishing.

Technical Specifications

Construction

Heat Treated Carbon Steel Body • HF Induction Welding

Available Materials

High Speed Steel (HSS-M2), Tungsten Carbide Tipped (TCT-K30)

Compatibility & Sizing

Blade Dimensions Reference

Length (mm)	Width (mm)	Thickness (mm)
82	29	3
110	29	3
136	32	3
155	32	3
306	35	3
170	35	3
80	29	1.5

Suitable Materials

- Hard wood
- Soft wood
