

High-Speed Textile Braiding Machine

This high-speed textile braiding machine is designed for producing braided cords, ropes, and sleeveings. It features multiple yarn carriers, precision tension control, and programmable pattern selection.

Product Overview

High-Speed Textile Braiding System

This high-speed textile braiding machine is engineered for the efficient production of diverse cords, ropes, and protective sleeveings. It features advanced precision tension control and programmable pattern selection, ensuring consistent quality across various material types. Built for industrial environments, it combines high production output with a durable, low-maintenance design.

Technical Specifications

Key Features

- High-speed production efficiency
- Precision tension control
- Programmable pattern selection
- Integrated control panel
- Durable construction

Production Efficiency

1 Low

Maintenance Level

Supported Materials

Synthetic fibers, Natural yarns, Metallic threads
