

High-Speed Three-Thread Overlock Sewing Machine with Lap Rolling

This is a super high-speed three-thread overlocker equipped with lap rolling functionality. The machine is designed for precise and efficient fabric edge finishing.

Overview

High-Speed Industrial Overlock Sewing Machine

This high-speed three-thread overlock sewing machine is engineered for precise fabric edge finishing in professional environments. It features a robust construction built for continuous, reliable operation and is equipped with an advanced differential feed mechanism to effectively prevent puckering or stretching. Designed for versatility, it handles a wide range of materials including knits, wovens, and synthetics, ensuring clean and durable seams for high-quality finished products.

Performance

Stitch Type	Three-thread overlock
Compatible Materials	Knits, Wovens, Synthetics

Features

Key Features

- High-speed operation
- Differential feed mechanism
- Adjustable stitch settings
- Integrated lubrication system
- Lap rolling capability

Construction

Robust Design • Continuous Operation
