

High Speed Two-Needle Lockstitch Sewing Machine

This high-speed, two-needle lockstitch sewing machine is designed for apparel and textile manufacturing. It offers precision stitching and high productivity, suitable for a range of fabrics and applications.

Overview

High-Speed 2-Needle Lockstitch Machine

This high-speed, 2-needle lockstitch sewing machine is engineered specifically for professional apparel and textile manufacturing environments. It delivers precision stitching and high productivity, making it an ideal solution for industrial sewing tasks that demand both efficiency and accuracy. With programmable controls and automatic thread trimming, this machine is designed to streamline workflows across a wide range of fabric applications.

Key Features

Core Functionalities

- High-speed operation
- 2-needle lockstitch configuration
- Automatic thread trimming
- Programmable control system
- Adjustable stitch parameters

Performance Metrics

Performance Rating

High Productivity • Precision Stitching • Industrial Grade

Primary Applications

Apparel Manufacturing, Textile Production, Industrial Sewing
