Overview

High-Speed Universal Grinder

This high-speed universal grinder is engineered for precision grinding of dry materials, offering a versatile capacity range of 100g to 400g. Constructed from durable stainless steel, it ensures hygiene and longevity, making it suitable for food processing, pharmaceutical, and chemical applications. With its powerful motor and efficient blade design, it delivers consistent results for grains, spices, herbs, and other agricultural products.

Technical Specifications

Capacity Range

100 g

Minimum Capacity

400 g

Maximum Capacity

Construction Material

Stainless Steel

Features

Key Features

- High-speed motor
- Adjustable grinding time
- Durable blade system
- Compact design

Safety & Compliance

Safety Mechanisms

Overload Protection, Secure Locking Mechanism

Applications

Target Industries

Food Processing • Pharmaceutical • Chemical • Laboratory • Small Business

Compatible Materials

- Grains
- Spices
- Herbs
- Dry agricultural products
