

High Speed Wet Wipe Packaging Machine

This automated machine is engineered for the high-volume production of individually wrapped wet wipes. It integrates material feeding, liquid saturation, cutting, folding, sealing, and output conveyance.

Overview

High-Efficiency Wet Wipe Production

This next-generation horizontal four-sides sealing packaging machine is engineered for high-volume production of individually wrapped wet tissues. By integrating light, electric, and gas systems, it offers advanced, automated processing for diverse hygiene products. The machine ensures consistent, hygienic packaging while minimizing manual handling and contamination risks.

Technical Capabilities

Sealing Type	Horizontal four-sides sealing
Automation	Yes

Applications

Compatible Wipe Types	Female care wipes, Makeup wipes, Medical disinfectant wipes, Isopropyl alcohol wipes, Lens cleaning wipes, Computer cleaning wipes, Aviation wipes, Catering wipes
-----------------------	--

Operational Features

Integrated Processes

- Material feeding
- Liquid saturation
- Cutting
- Folding
- Sealing
- Output conveyance

User Interface	User-friendly interface for parameter adjustments and real-time monitoring
----------------	--
