

High-Strength Alloy Truck Wheel

This high-performance truck wheel is constructed from high-strength steel alloy for maximum durability and load-bearing capacity. It is engineered for optimal balance and reduced vibration, ensuring a smooth and stable ride.

Product Overview

High-Strength Alloy Truck Wheel

This high-performance alloy wheel is engineered specifically for heavy-duty trucks and commercial vehicles. Constructed from a robust steel alloy, it provides exceptional load-bearing capacity and impact resistance for demanding environments. The design incorporates a corrosion-resistant coating for longevity, while its optimized balance ensures reduced vibration and a smoother ride.

Performance & Build

Durability Metrics

1 Level

Corrosion Resistance

Material Composition	High-strength steel alloy
Key Features	Corrosion-resistant, Heat dissipation design, Optimized balance, Lightweight construction

Compatibility & Standards

Compatible Vehicle Models

- FAW J6P-460
- Standard truck tire sizes

Safety Compliance

Industry Standard Compliant
