

High-Strength Alloy Wheel Rim

This high-strength alloy wheel rim is designed for durability and performance. It features a multi-spoke design with circular cutouts for weight reduction and enhanced cooling.

Product Overview

High-Performance Alloy Rim

This high-strength alloy wheel rim is engineered for durability and optimal performance in demanding driving conditions. Featuring a sophisticated multi-spoke design with integrated circular cutouts, it effectively balances weight reduction with enhanced brake cooling capabilities. The aesthetic finish combines a polished silver face with a contrasting black inner barrel, making it a robust and reliable solution for various vehicle applications.

Technical Specifications

Design Features

- Multi-spoke architecture
- Weight-reduction circular cutouts
- Enhanced cooling design

Finish Style

Polished Silver Face, Black Inner Barrel
