Product Overview

High-Strength Fastening Solutions

This collection features high-strength button head bolts and hex nuts designed for robust industrial applications. The button head design ensures a flush finish and increased surface contact, while the J-bolts offer versatile anchoring capabilities with their 90-degree bend. Constructed from durable, galvanized steel, these components are engineered to provide secure and reliable connections in demanding environments.

Technical Specifications

Included Components

- Button Head Bolts
- Hexagonal Nuts
- Square Nuts
- J-Bolts

Design Features

Flush Finish • Increased Surface Contact • 90-Degree Bend (J-Bolts) • Threaded Shafts

Head Markings

SM

Material Finish

Galvanized Steel, Durable Metal
