## Product Overview

### High-Performance Industrial Steam Solution

The JNX-G30 is a robust industrial-grade steam cleaner engineered for demanding environments, from chemical plants to food processing facilities. Utilizing advanced instantaneous vaporization technology, it delivers high-pressure steam at temperatures up to 200°C, ensuring effective sterilization, disinfection, and deep decontamination without the need for harsh chemicals. Designed for safety and efficiency, it features water-electricity separation, multiple safety protections, and significant water and energy savings compared to traditional cleaning methods.

## Technical Specifications

Power Output	30 KW
Steam Pressure	30 BAR
Steam Temperature	178-200
Steam Quantity	90 L/H
Supported Voltages	380V, 480V, 660V

## Equipment Details

Dimensions	1100 x 480 x 6520 mm
Machine Weight	89 KG
Water Tank Capacity	18 L
Steam Pipe Length	10 m

## Operational Features

### Performance Metrics

**60 sec**

Steam Generation Time

**90 %**

Water Savings

**20 %**

Energy Savings

### Primary Functions

- Sterilization (kills bacteria/mold)
- Disinfection (eliminates viruses)
- Deodorization (removes odors)
- Decontamination (removes oil/dirt)

### Water Supply Mode

Auto / Manual

## Applications

### Industrial Applications

Chemical Industry, Food Processing, Dairy Plants, Pharmaceuticals, Petrochemical, Mining
