

High Tensile Steel Trawling Shackle

This high tensile steel trawling shackle is a Dumpy Type C1045 shackle. It is designed for heavy-duty lifting and rigging applications.

Product Overview

High Tensile Trawling Shackles

These high-tensile, self-colored trawling shackles, specifically the Dumpy Type C1045, are engineered for demanding heavy-duty lifting and rigging operations. Constructed from premium-grade steel, they offer exceptional structural integrity and long-term durability. Their robust design makes them an essential component for marine, construction, and industrial environments where reliability is paramount.

Technical Specifications

Surface Finish

Self-colored

Material

High Tensile Steel

Model Type

Dumpy Type C1045

Applications

Primary Function

- Heavy-duty lifting
- Rigging applications
- Trawling operations

Suitable Industries

Marine, Construction, Industrial
