

High-Tension Hacksaw Frame

This is a professional-grade hacksaw frame designed for cutting metal, plastic and wood. The high-tension frame ensures straight and accurate cuts, and the ergonomic handle provides a comfortable grip.

Product Overview

Professional High-Tension Hacksaw

This high-tension hacksaw frame is engineered for precision and durability in professional cutting tasks. Featuring a lightweight yet robust aluminium frame, it provides the structural integrity needed for straight and accurate cuts across metal, plastic, and wood. The ergonomic soft-grip handle ensures user comfort during extended use, while the dual-spigot design offers versatile cutting angles.
