

High-Torque Starter Motor

This is a high-torque starter motor designed for heavy-duty applications. It features a robust solenoid, durable gear reduction, and a corrosion-resistant finish.

Product Overview

Heavy-Duty Starter Motor Solution

This high-torque starter motor is engineered specifically for demanding heavy-duty applications. Designed for reliability and longevity, it features a 7.5 kW power output to ensure consistent starts in rigorous operating environments. Its robust construction makes it an ideal replacement part for professional industrial machinery.

Technical Specifications

Power Output

7.5 KW

Power

Service Grade

Heavy Duty

Voltage

24 V

Teeth Count

12

Rotation

Clockwise (CW)

Cross-Reference

Compatible OEM References

- 6360N
- 50-152-1
