

High-Tower Plastic Film Blowing Machine

This high-tower plastic film blowing machine is designed for producing polyethylene films. The machine is suitable for manufacturing various plastic products, including packaging films and bags.

Product Overview

High-Tower Film Extrusion Solution

This high-tower plastic film blowing machine is engineered for the efficient production of polyethylene films. Featuring a robust steel structure with multi-level access platforms, it ensures ease of operation and maintenance. The system integrates a centralized control panel, a precision winding unit, and a high-performance extrusion die to deliver consistent results for packaging films and bags.

Technical Specifications

Production Capabilities

- Packaging film production
- Plastic bag manufacturing

Suitable Materials

Polyethylene

Design & Construction

Structural Build

Robust Steel Structure • Multi-platform Access

Core Components

Component	Function
Control Panel	Extrusion process operation
Winding Unit	Film collection
Extrusion Die	Base material processing
