

High-Velocity Electric Air Circulator Fan

This high-velocity electric fan is designed for powerful air circulation. It features a robust metal cage for safety and durability, with a three-blade propeller optimized for maximum airflow.

Overview

High-Velocity Air Circulation

This high-velocity electric air circulator fan is engineered for powerful airflow and effective cooling in large spaces. Built with a robust metal cage and a sturdy frame, it ensures both durability and safety during operation. The optimized three-blade propeller design maximizes air movement, making it an ideal solution for industrial or commercial ventilation needs.

Technical Specifications

Blade Color

Blue

Blade Configuration

3-blade optimized propeller

Construction

Stability Features

- Sturdy metal frame
- Rubber feet for vibration dampening and stability

Construction Materials

Metal Cage, Metal Frame

Power and Usage

Recommended Environment

Indoor use

Power Connection

Standard plug with white power cord
