Overview

High-Velocity Cooling Performance

This high-velocity fan is engineered with a pure copper motor, ensuring long-term durability, low noise operation, and efficient temperature management. Its optimized aluminum-iron blade structure delivers powerful airflow, making it an ideal cooling solution for diverse environments including homes, hotels, stores, and large halls. With a stylish design and adjustable tilt functionality, it offers both aesthetic appeal and precise directional control for professional-grade air circulation.

Technical Specifications

Motor Type	Pure Copper
Power Consumption	120 W
Voltage/Frequency	120V-60Hz
Speed Settings	3
Blade Material	Aluminum-Iron

Features

Key Features

- Adjustable angle of pitch
- Low noise operation
- Low temperature-rising motor
- Powder or chrome guard finish
- Versatile floor and desk placement

Recommended Usage	Home, Hotel, Retail Store, Hall
