

High-Velocity Industrial Ventilation Fan

This high-velocity industrial fan is designed for powerful air circulation and ventilation. It features a robust metal frame, safety grill, and adjustable tilt for directional airflow.

Product Overview

High-Velocity Industrial Ventilation

This high-velocity industrial fan is engineered for powerful air circulation and effective ventilation in demanding environments. Featuring a robust metal frame and a protective safety grill, it ensures durability and operational safety. The unit includes an adjustable tilt mechanism, allowing for precise directional airflow to meet specific cooling or ventilation needs.

Technical Specifications

Primary Features

- Robust metal frame construction
- Integrated safety grill
- Adjustable tilt for directional airflow
- High-velocity air movement

Performance Highlights

1 Yes

Adjustable Tilt

1 Yes

Safety Grill Included

Suitable Environments

Industrial, Commercial, Residential
