

High-Visibility Safety Vest

This high-visibility safety vest enhances visibility in various work environments. It is constructed from durable, lightweight fluorescent yellow fabric with reflective stripes.

Product Overview

Professional High-Visibility Protection

This high-visibility safety vest is engineered for maximum performance in professional work environments, including construction sites and traffic control zones. Constructed from durable 120GSM fluorescent fabric, it ensures reliable visibility in both daylight and low-light conditions. The ergonomic, open-design layout facilitates quick application, while the included storage pouch provides convenient portability for active workers.
