Product Overview

Professional Traffic Management Solution

These high-visibility traffic cones are designed to provide temporary traffic control in diverse environments, from highway construction sites to emergency response scenes. Manufactured from premium-grade, flexible PVC, the cones are built to withstand impacts while maintaining their structural integrity. With a robust, heavy-duty black base, they offer superior stability even in windy conditions, ensuring reliable hazard marking and lane guidance.

Technical Specifications

Material	Premium Grade PVC
Base Construction	Heavy-duty black base
Visibility Features	Fluorescent Orange Color, Reflective Sleeves
