

High Voltage Expulsion Fuse Cutout

This is a high-voltage expulsion fuse cutout designed for overcurrent protection. It is suitable for outdoor applications and provides dependable protection against faults and surges.

Product Overview

High Voltage Expulsion Fuse Cutout

This high-voltage expulsion fuse cutout is engineered for reliable overcurrent protection in electrical distribution systems. It is designed to safely interrupt fault currents and surges, ensuring the integrity of the grid. Built to withstand outdoor environments, the unit features a durable insulating body and a hinged fuse holder mechanism for effective arc-quenching.

Compliance & Standards

Compliance Standards	IEC 60282-2:2008, IEEE Std C37.41-2008, IEEE Std C37.42-2009
Testing Certification	Yes
