

High-Volume Water Transfer Pump

This water pump is designed for agricultural and irrigation applications. It delivers high-volume water transfer for efficient drainage and irrigation.

Product Overview

High-Volume Water Transfer Pump

This robust and reliable water pump is engineered for demanding agricultural and irrigation applications. It features a powerful 2.1 HP engine designed to deliver high-volume water transfer, ensuring efficient drainage and irrigation performance. With a focus on durability and portability, this unit is built to withstand challenging on-site environments while maintaining optimal fuel efficiency.

Technical Specifications

Engine Power

2.1 HP

Power Output

Suitable Applications

Agricultural Irrigation, Field Drainage, Water Transfer

Features

Key Benefits

- High-volume transfer capacity
- Durable construction for demanding environments
- Easy portability and setup
- Efficient fuel consumption
