

Highway Construction Project

This project focuses on highway construction and infrastructure development. It has been recognized with awards for high quality and user satisfaction.

Project Overview

Highway Construction Infrastructure

This large-scale highway construction project represents a high-standard engineering achievement in civil infrastructure. The project encompasses advanced road paving techniques and reliable power distribution network support. Renowned for its structural integrity and operational quality, the infrastructure meets stringent national standards for engineering excellence.

Certifications & Awards

Awards and Recognition

Luban Prize (National High Quality Project), Zhan Tianyou Civil Engineering Award

Infrastructure Details

Safety Installations

- Clear white lane markings
- Metal roadside guardrails

Road Surface

High-durability dark asphalt

Integrated Power Systems

Yes
