

Highway Guardrail Post Driver

This pile driver is designed for installing highway fences. It is used for embedding steel pipe poles for new highway construction.

Product Overview

High-Efficiency Highway Guardrail Installation

This hydraulic pile driver is engineered specifically for the rapid and precise installation of road safety barriers. Mounted on a mobile wheeled chassis, it offers excellent maneuverability for roadside operations. The integrated hydraulic arm simplifies the lifting and positioning of posts, significantly increasing installation efficiency on highways and roadways.

Technical Specifications

Key Operational Features

- Hydraulic arm for lifting
- Precision post positioning
- Mobile wheeled design

Power System	Hydraulic
Chassis Configuration	Wheeled Chassis
Primary Application	Highway Guardrails, Road Safety Barriers, Post Installation
