

# Hollow Coil Winding Machine

This hollow coil winding machine features automatic reel and stripping molding. Its frequency conversion control ensures stable performance.

## Product Overview

### Professional Hollow Coil Winding Solution

The SRK24-1 is a precision-engineered hollow coil winding machine designed for consistent and efficient air coil production. It features a robust mechanical structure with advanced frequency conversion control to ensure stable, high-performance operation. Designed for reliability and ease of maintenance, this machine offers adjustable winding parameters and seamless reel-and-stripping functionality to meet diverse manufacturing needs.

## Technical Specifications

### Max Speed

**30 RPM**

Max Speed

Spindle Number	1
Wire Size Range	0.35 - 1.5mm
Max Winding Turns	30 Laps
Coil Inner Diameter	1 - 10mm
Stripping Length	3 - 10mm

## Machine Dimensions

### Machine Dimensions & Weight

Specification	Value
Machine Size	1100x600x1130mm
Package Size	1180x680x1210mm
Net Weight	150kg
Gross Weight	190kg

## Features

### Machine Features

- Automatic reel and stripping molding at once
- Frequency conversion control for stable performance
- Precision mechanical structure for durability
- Fine-tuning adjustment for coil numbers
- Flexible winding directions (Left, Right, Sparse, Tight)

### Certifications

CE, ISO, CQC
